DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7/28/06 has been entered.

REJECTIONS WITHDRAWN

2. There are no rejections repeated.

REJECTIONS REPEATED

3. All of the rejections maintained and set forth in the final rejection of 3/30/06, pages 2-3, paragraphs 2-4. Applicant has added the phrase "consisting essentially of" to 1 and 18.

For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to "comprising." See, e.g., PPG, 156 F.3d at 1355, 48USPQ2d at 1355 ("PPG could have defined the scope of the phrase consisting essentially of for purposes of its patent by making clear in its specification what it regarded as constituting a material change in the

Art Unit: 1772

basic and novel characteristics of the invention.""). See also *In re Janakirama-Rao*, 317 F.2d 951, 954, 137 USPQ 893, 895-96 (CCPA 1963). When an applicant contends that additional steps or materials in the prior art are excluded by the recitation of "consisting essentially of," applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant's invention. *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). It is not clear in the applicant's specification what is regarded as a material change. Furthermore, applicant has not shown how the addition of ethylene-alpha-olefin elastomer constitutes a material change in the air sleeve. A mere statement that the specification does not include the ethylene-alpha-olefin elastomer does not distinctly point to a material change. Applicant has stated the intended improvement in adhesion would not be achieved. However, applicant has not shown in the specification why the addition of the ethylene-alpha-olefin elastomer would effect the intended improvement in adhesion would not be achieved.

NEW REJECTIONS

4. There are no new rejections.

ANSWERS TO APPLICANT'S ARGUMENTS

5. Applicant's arguments filed 6/26/06 have been carefully considered but are deemed unpersuasive.
